## Sunny Day & Slippery Restarts

We are always concerned that the weather before the Allen will be dry and all the sections too easy. No need to worry this year, from an organiser's perspective the conditions were ideal. The recent rain had been just sufficient to made the sections slippery without washing the mud away.

The route was much the same as recent years with Tog Hill giving everyone a gentle start. Bitton Lane was up to the mark claiming a few from every class who had to restart. Big Uplands has a mind of its own and this year was very slippery, catching some from all classes. Guys restart as usual was the one to do in the yellow and red category, with successes for Tony Young , Dudley Sterry , and Julian Dommett, but no big Beetles this year. Strobe seems to have lost the plot in recent years and despite Tyre limits only caught out two. Earlier in the year we created a gully near the top of Travers to reduce the erosion caused by water running down the track to the bottom. As a bonus the mud is no longer washed away giving the restart a little more bite than last year and 11 succumbed .

We reduced the ruts on Burledge this year so as to make it more than just a test of ground clearance. It seems to have worked with clears in all classes. Nanny Hurns is always tricky and produces some peculiar results. Some clears in all but class 6, it appears small engined Beetle drivers had better give their larger engined colleagues the secret. Climb of the day must go to Gillian Hayward who got her MGB GT round taking class 5 on her first Road Trial. Must be something in the genes !

Having lost time earlier in the day the last few sections went well and we had the final competitors signed off by 5 :30.

The results revealed 5 clean runs from 3 classes, Peter Treliving in class 2, Giles Greenslade and Murray Macdonald in class 4, and Tony Young and Dudley Sterry in class 8. Fastest on the tests were Tony and Dudley both on 32.1 seconds. The next tie decider being smallest engine size made Tony's 1600cc, the winner because Dudley's 1466cc allowing for the forced induction coefficient of 1.4 becomes 2052cc.
